

A Private collector in Turkey

Despite the form of the stern which would suggest a British ship-of-the-line, this Bone Ship Model seems to be the French frigate ***Achille***, according to the figurehead. It measures 57 cm (total length), 45 cm height, 19.5 cm width (main yard) and has 76 guns. The figurehead is of a warrior. The model belonged to the Collection of Dr. Willner, Bremen, to a Private collector in Northern Germany, and now to a Private collector in Turkey. The photos show the model before restoration.
