

A Private collector in Hamburg

A POW bone ship model of a **First rate warship, three gun decks.** The model stands in a straw-decorated box, which is mirrored from the inside. A male warrior figurehead, with a spear, decorates the bow of the ship. The mainsail yard carries a black colored studding sail boom. The view of the Galion and the foredeck shows the butluve. A staircase leads to the poop deck, where we see an indicated skylight under the gaff boom. A balustrade separates the poop from the main deck. The model originates from the early 19th century, it has a total length of 27 cm, and is 23.5 cm high.
